Letter Reference No: DC/BT121/12092019

Negative Brucellosis Test

Herd No. 041808

Dear APHIS DATA MIGRATION KEEPER

As you are aware blood sampling for Brucellosis was carried out on your herd 041808 completed on 12/09/2019.

I write to inform you that all cattle presented for testing showed a negative result to testing, except (if applicable) the animal(s) listed below:

Ear Tag Number(s)	DOB	Result Status/Result	Individual test due	Due by Date
UK 9 151933 2855 7	01/08/2009	OK		
UK 9 170817 0605 3	06/05/2013	OK		

Other herd or individual animal restrictions may be in force therefore you should check these prior to moving any cattle out of the herd.

N.B. A negative serological test is consistent with the animal being free of brucellosis at the time of test, but it cannot be a guarantee of this.

If you have any queries, please contact my staff at the address above.

Yours sincerely,

AZAD SHAIKH
on behalf of Department of Agriculture, Environment and Rural Affairs
